

LOGAN ENERGY LIMITED

QUALITY, ENVIRONMENTAL AND HEALTH & SAFETY POLICY AND OBJECTIVES

Logan Energy Limited and subsidiaries was established in 1995 offering a full turnkey service for the design, integration, installation and maintenance of fuel cells. Our expertise in the application of fuel cells includes electricity generation, combined heat and power (CHP), combined cooling heat and power (CCHP or tri-generation) utilising a number of base fuels ranging from natural gas and LPG through various bio-fuels to anaerobic digester gases. We offer our clients unrivalled experience in the integration and installation of fuel cell technologies from a wide range of manufacturers and are responsible for the installation of over 140 fuel cell solutions with an installed capacity of 60MWe.

Our systems provide solutions that:

- ✓ Achieve higher availability than alternative systems
- ✓ Help reduce CO₂
- ✓ Eliminate products of combustion
- ✓ Provide the highest efficiencies available
- ✓ Are virtually silent in operation

Logan Energy Limited has developed a sound reputation and to that end, we work to the highest standards and specifications and exhaustively monitor every detail of procurement, transport, delivery and service. In addition to ensuring a quality service is provided to our clients, we recognise the environmental and health & safety implications of our operations and as such, we are committed to a programme of continual quality, environmental and health & safety improvement which is reviewed on an annual basis.

The specific aims of our policy are:

1. To implement and maintain a comprehensive quality, environmental and health & safety management system which will form an integral part of our existing organisational culture of commitment to continual improvement.
2. To ensure we comply with all applicable legal and other requirements which relate to our identified environmental aspects and health & safety hazards.
3. To ensure we operate in a manner which prevents injury and ill-health
4. To provide adequate training to all our employees and sub-contractors to enable them to work within and contribute to our policy commitments.
5. To promote our commitment to providing a quality service in an environmental responsibility manner to our contractors and suppliers by making this policy available to all stakeholders and customers upon request.

This policy will be subject to regular review.
