

Field Service Manager

We have a unique opportunity for an enthusiastic engineer with a sound understanding of engineering principles, experience of practical design and installation of energy systems and good project management skills.

We are a growing company which is a recognised world leader in the integration, installation and operation of fuel cells and hydrogen technologies.

Due to expansion our subsidiary company Proton Power Ltd currently has a unique opportunity for a Field Service Manager to assist with the design of hydrogen-based equipment and to ensure that the equipment is built to the best safety requirements, on time and to budget.

The position is a customer facing role and requires a diverse set of skills and a flexible attitude.

We are looking for a candidate that can excel at the following:

- Project Management, including scheduling, specification and sourcing of plant, management of staff and subcontractors, project budgets and site management.
- Management of, and assistance in executing, elements of the Field Services activities including maintenance contracts.
- Site Management including QHSE.
- Procurement of maintenance and project components
- Assistance with the design and integration of mechanical, electrical and controls components
- Assistance with estimation for potential new installations and maintenance contracts
- Assistance with specification and procurement of subcontract work.

This is an opportunity for an all-round engineer with initiative, enthusiasm to help us build the technology of the future.

We are aware that most candidates will not have experience in our specific field of operation so training will be provided both in house and for specific products.

Package:

An appropriate remuneration package will be offered depending on experience.

Location:

The position is based in Wallyford but will involve travel to all parts of the UK, Europe and USA.

Application:

Please submit a CV and covering email addressing how your experience and ability is applicable to the job described, to Hazel MacPhail to: info@logan-energy.com
